Thanks Ex. 4 - CBI

In hind sight there are always things we wish we would have done.  
I appreciate you getting me this draft data.

Greetings and Namaste – Rich,

Attached is the draft version of the data package you requested. Feel free to use the contents/data for your analysis, but please do not circulate the report, as it is not yet complete and not yet peer-reviewed (as per SERAS protocol).

If the CR652 (trailer home where a man was sleeping on the sofa) system is not performing as intended, the culprit may be the low chlorine dosing rate (about 1/3<sup>rd</sup> of that at CR644). In addition, the contact time (or the residence time) at CR652 was 40 minutes as compared to 56 minutes at the CR644 system.

Rich, I have to commend you for your idea about collecting and setting the By-Pass water sample from CR644 in the sun. However, I wish we had collected the By-Pass water at CR652 system and done the same. I wonder, if we would have gotten visual evidence of the lack of treatment effect at CR652.

Please call or email me if you have questions or need to discuss the data.

Sincerely,

**Ex. 4 - CBI**

Good morning....

How are you doing on compiling your data from the Dimock visit? I am trying to figure out the apparent failure of one of the treatment systems and could really use the numbers you recorded.  
thanks  
Rich

Greetings & Namaste – Rich,

It was indeed a great pleasure meeting and working with you.

Indeed all is well. Hope you had some relaxing time with your family over the holiday last week. I had taken Thurs & Friday off to spend time with my family.

As we speak, I am working on organizing my notes and data. I will get it to you as soon as it is ready, in a couple of days.

I will call you on Thursday.

Thanks

**Ex. 4 - CBI**

Namaste Ex. 4 - CBI  
Hope all is well.

I need the data you collected during our field activities at Dimock. We seemed to have gotten wildly different concentrations of Mn in our treated samples so I am forensically now trying to figure out an explanation. The methane is not critical for now. I am mostly interested in temperatures and other measurements you recorded at the taps and by pass and well head.

Could you please as soon as possible record your measurements into a spread sheet and forward them to me?

thanks, please give me a call if you want to talk about this whole endeavor.

Rich
